CONTENTS OF VOLUME 42

PART 1 (March 1986)

A multinomial model for estimating the size of a whale population from incomplete census data
J. E. Zeh, D. Ko, B. D. Krogman, and R. Sonntag 1
A method for inferring the minimum number of genes controlling the reactions of cultivars of a host plant species to isolates of a pathogen under a gene-for-gene model ..... R. A. Sutherland 15
Joint maximum likelihood estimation of genetic and mating structure using open-pollinated progenies
K. Ritland 25
Statistics of natural populations. III. Sequential sampling plans for the estimation of gene frequencies
M. J. Sobel, J. Arnold, and M. Sobel 45
Offspring–parent genotypic regression: How linear is it? ..... A. Gimelfarb 67
Maximum likelihood estimation for cytogenetic dose–response curves ... E. L. Frome and R. J. DuFrain 73
The impact of litter effects on dose–response modeling in teratology
L. L. Kupper, C. Portier, M. D. Hogan, and E. Yamamoto 85
A sequential test for comparing two infection rates in a randomized clinical trial, and incorporation of data accumulated after stopping ..... E. Samuel-Cahn and Y. Wax 99
On the application of linear relative risk regression models ..... R. L. Prentice and M. W. Mason 109
Longitudinal data analysis for discrete and continuous outcomes ..... S. L. Zeger and K.-Y. Liang 121
Multivariate bioassay, combination of bioassays, and Fieller's theorem ..... M. S. Srivastava 131
Analysis of the volume of red blood cells: Application of the expectation–maximization algorithm to grouped data from the doubly-truncated lognormal distribution
C. E. McLaren, G. M. Brittenham, and V. Hasselblad 143
Evaluation of trends in middle ear disease among Australian aborigines ..... H. M. Hudson 159
Estimation of Simpson's diversity when counts follow a Poisson distribution
N. I. Lyons and K. Hutcheson 171
Shorter Communications
An approximate likelihood procedure for censored data ..... D. Oakes 177
A note on Shirley's nonparametric test for comparing several dose levels with a zero-dose control
D. A. Williams 183
A nonparametric version of Williams' test for a randomized block design ..... D. E. House 187
The Consultant's Forum
Reader Reaction: Testing for a treatment effect in the presence of nonresponders
D. D. Boos and C. Brownie 191
Reader Reaction: Alternative estimators of the common odds ratio for 2 × 2 tables ..... N. Mantel 199
Response ..... W. W. Hauck 201
Treatment effects in competing-risks analysis of prostate cancer data ..... R. Kay 203
Sample size tables for bounding small proportions ..... E. L. Korn 213
Correspondence 217
Book Reviews 221
Corrections 229

PART 2 (June 1986)

Statistical analysis of field experiments using neighbouring plots ..... J. Besag and R. Kempton 231
Stability comparison of intercropping and monocropping systems
R. Mead, J. Riley, K. Dear, and S. P. Singh 253
A review of estimating animal abundance ..... G. A. F. Seber 267
More on "Biased selection of controls for case–control analyses of cohort studies"
J. M. Robins, M. H. Gail, and J. H. Lubin 293
On the design of synthetic case–control studies ..... R. L. Prentice 301
Estimators of the Mantel–Haenszel variance consistent in both sparse data and large-strata limiting models ..... J. Robins, N. Breslow, and S. Greenland 311
Nonparametric methods for survival/sacrifice experiments ..... A. Dewanji and J. D. Kalbfleisch 325
The incorporation of historical control information in tests of proportions: Simulation study of Tarone's procedure ..... R. N. Tamura and S. S. Young 343

On the bias of commonly used measures of association for 2 × 2 tables ..... N. P. Jewell 351
A measure of 2 × 2 association with stable variance and approximately normal small-sample distribution: Planning cost-effective studies ..... H. C. Kraemer 359
Estimation of the distribution of blood vessel diameters from the arteriovenous passage of microspheres ..... C. A. McMahan, L. C. Maxwell, and A. P. Shepherd 371
Estimation of response to selection and utilization of control populations for additional information and accuracy ..... W. M. Muir 381
Effects of misspecifying genetic parameters in lod score analysis
F. Clerget-Darpoux, C. Bonaïti-Pellié, and J. Hochez 393
A comparison of confidence interval methods for the intraclass correlation coefficient
A. Donner and G. Wells 401
Shorter Communications
Testing for simple independent action between two factors for dichotomous response data
W. W. Piegorsch, C. R. Weinberg, and J. K. Haseman 413
Combining multivariate bioassays ..... M. Meisner, H. B. Kushner, and E. M. Laska 421
Testing for pairwise independence ..... M. Haber 429
The Consultant's Forum
Analysis of data from incomplete block designs ..... F. G. Giesbrecht 437
Correspondence 449
Book Reviews 451
Correction 459

PART 3 (September 1986)

Supplementary analysis at the conclusion of a sequential clinical trial ..... J. Whitehead 461
Selection of variables in mixed-variable discriminant analysis ..... J. J. Daudin 473
A variable-grid algorithm for smoothing clustered data ..... F. Musmeci and D. Vere-Jones 483
Survival estimation using splines ..... A. S. Whittemore and J. B. Keller 495
Evaluation of sample size and power for analyses of survival with allowance for nonuniform patient entry, losses to follow-up, noncompliance, and stratification ..... J. M. Lachin and M. A. Foulkes 507
Linear rank tests for interval-censored data with application to PCB levels in adipose tissue of transformer repair workers ..... S. G. Self and E. A. Grossman 521
Inference based on Type II censored samples ..... H. Schneider and L. Weissfeld 531
The large-sample relative efficiency of the Mantel–Haenszel estimator in the fixed-strata case
A. Donner and W. W. Hauck 537
The beta–geometric distribution applied to comparative fecundability studies
C. R. Weinberg and B. C. Gladen 547
Constant-parameter capture–recapture models ..... C. Brownie, J. E. Hines, and J. D. Nichols 561
Choosing near-linear parameters in the four-parameter logistic model for radioligand and related assays ..... D. A. Ratkowsky and T. J. Reedy 575
Tests of significance using regression models for ordered categorical data
S. M. Snapinn and R. D. Small 583
Carryover and the two-period crossover clinical trial ..... A. R. Willan and J. L. Pater 593
Sample sizes in the multivariate analysis of repeated measurements ..... E. F. Vonesh and M. A. Schork 601
Regressive logistic models for familial disease and other binary traits ..... G. E. Bonney 611
Maximum likelihood techniques for the mapping and analysis of quantitative trait loci with the aid of genetic markers ..... J. I. Weller 627
Shorter Communications
Interval estimation of the median lethal dose ..... D. A. Williams 641
A two-stage test for ordered means in the Poisson case with an example from mutagenicity testing
J. E. Hewett and E. Bair 647
Regression analysis in the presence of heterogeneous intraclass correlations
A. Muñoz, B. Rosner, and V. Carey 653
Design of experiments for estimating inverse quadratic polynomial responses
J. M. Cobby, P. F. Chapman, and D. J. Pike 659
The Consultant's Forum
Reader Reaction: Log-linear models for linked loci ..... B. S. Weir and S. R. Wilson 665
Response ..... M. Haber 670
Rejoinder 670
Reader Query: Alternative hypotheses for the effects of drugs in small-scale clinical studies
D. Salsburg 671

Correspondence ... 675
Book Reviews ... 677
The Biometric Society ... 687
Correction ... 691

PART 4 (December 1986)

The natural variability of vital rates and associated statistics ... D. R. Brillinger 693
Discussion: N. Breslow, C. L. Chiang, J. M. Hoem, P. Jagers, N. Keiding, L. Kish, K. G. Manton, and J. W. Tukey 712
Statistical models for stereological inference about spatial structures: On the applicability of best linear unbiased estimators in stereology ... E. B. Jensen and R. Sundberg 735
Some robust density estimators for spatial point processes ... G. Clayton and T. F. Cox 753
The bifurcating autoregression model in cell lineage studies ... R. Cowan and R. Staudte 769
Log-normal variation belts for growth curves ... P. Jolicoeur and A. A. Heusner 785
On multiple comparisons in the randomization analysis of growth and response curves G. O. Zerbe and J. R. Murphy 795
Unbalanced repeated-measures models with structured covariance matrices R. I. Jennrich and M. D. Schluchter 805
A note on Foss's method of obtaining initial estimates for exponential curve fitting by numerical integration ... J. L. Fresen and J. M. Juritz 821
ANOVA interactions interpreted by partial least squares regression ... A. H. Aastveit and H. Martens 829
A proportional hazards model for interval-censored failure time data ... D. M. Finkelstein 845
A Markov model for analysing cancer markers and disease states in survival studies ... R. Kay 855
Standardized tumor rates for chronic bioassays ... R. L. Kodell, D. W. Gaylor, and J. J. Chen 867
Designs for slope ratio assays ... J. P. Buonaccorsi 875
The kappa coefficient of agreement for multiple observers when the number of subjects is small S. T. Gross 883
Alternative estimation procedures for $\Pr(X < Y)$ in categorized data J. S. Simonoff, Y. Hochberg, and B. Reiser 895
Global cross-ratio models for bivariate, discrete, ordered responses ... J. R. Dale 909
Sample size for individually matched case–control studies ... R. A. Parker and D. J. Bregman 919
Sample size for case–control studies using Cochran's statistic R. F. Woolson, J. A. Bean, and P. B. Rojas 927
A method for computing the elements of the Leslie matrix ... R. E. Plant 933
The index of dispersion test for the bivariate Poisson distribution ... S. Loukas and C. D. Kemp 941
Shorter Communications
Methods of estimation in log odds ratio regression models ... N. E. Breslow and J. Cologne 949
Logistic regression methods for retrospective case–control studies using complex sampling procedures ... T. R. Fears and C. C. Brown 955
The calculation of probabilities in rejecting bioequivalence ... K. F. Yee 961
Hypothesis testing for proportions with overdispersion ... S. E. Pack 967
Estimating the proportion of uncatchable animals in a population by double-sampling N. J. Aebischer 973
The Consultant's Forum
Precision of assessing anthelmintic efficacy ... J. L. Gill, G. F. Ericsson, and I. S. Helland 981
Reader Reaction: Fitting the negative binomial distribution ... F. E. Binet 989
Reader Reaction: Omitting covariates from the proportional hazards model ... T. M. Morgan 993
Response ... S. W. Lagakos and D. A. Schoenfeld 995
Correspondence ... 997
Book Reviews ... 1001
Corrections ... 1009
